THE BEAUTY AUTHORITY

The new anti-redness peel
It may sound contradictory that a chemical peel can actually alleviate chronic redness. I see a side benefit: the treatment is often redder skin but the in-office Glytone by Environ MA is designed to do just that. Boosting a 40 percent concentration of mandelic acid, this in-office peel uses a patented carrier technology and a lower pH for optimal results. It can also be used to ‘spot-treat’ certain areas of the face so that skin is as whole isn’t exposed to the acid. glytoneusa.com
